## EDUCATION

**Government Engineering College**                                                                   Rajkot, Gujarat
*Bachelor of Engineering in Computer Engineering*                                         *Sept. 2021 – Jun 2025*
CPI: 8.69

## TECHNICAL SKILLS

**Languages**: JavaScript, HTML/CSS, Java, C, MySQL
**Frameworks/Libraries**: React, Node.js, Express.js, MongoDB, Next.js, Tailwind CSS, Material-UI, Bootstrap
**Developer Tools**: VS Code, Github

## EXPERIENCE

**Software Developer Intern**                                                                    Jan 2025 – Apr 2025
*Harikrishna Solutions*                                                                              *Surat, Gujarat*

- Developed a fully functional **e-commerce website** using the **MERN stack (MongoDB, Express.js, React.js, Node.js)**, optimizing product listing, user authentication, and cart functionalities for a seamless shopping experience.
- Integrated **Firebase Authentication** for secure user sign-up and log-in and implemented **Razorpay** payment gateway, enabling real-time online transactions and improving checkout reliability by **95%**.
- Implemented dynamic product management with admin controls, achieving **over 85% reduction in manual product updates**, and ensured responsive UI using **Tailwind CSS** and **React Hooks** for enhanced user interaction.

**Web Developer Intern**                                                                         Jun 2024 – Jul 2024
*Ananta Technolab*                                                                                   *Rajkot, Gujarat*

- Strengthened front-end development skills by building responsive websites using **HTML5, CSS3, and Bootstrap**, focusing on clean layouts and user-friendly interfaces.
- Applied **Flexbox** and **Bootstrap Grid System** to ensure mobile-first responsive design, reducing layout issues across screen sizes by **over 80%** during internal QA.
- Created and customized multiple landing pages and UI components, improving development speed by **30%** through reusable and scalable CSS structures.

## PROJECTS

**PickNBuy** / *React, Node.js, Express.js, MongoDB, Material UI, Bootstrap*

- Designed and constructed a feature-rich **e-commerce platform** using the **MERN stack**, enabling users to browse products, manage carts, and securely place orders with a responsive interface across all devices.
- Built a custom **admin panel** to manage products, orders, and users, streamlining backend operations and reducing manual updates by **over 85%**.
- Deployed the backend on **Render** and the frontend on **Netlify**, ensuring seamless CI/CD integration and achieving **90% uptime** during testing and demo presentations.
- **Live Links**: **PickNBuy | Admin Panel**
- **Github**: **Frontend | Backend**

**MotiveMentor** / *Next.js, Tailwind CSS, Firebase*

- Created a dynamic motivational platform using **Next.js and Tailwind CSS**, featuring an engaging **landing page** with responsive design optimized for all screen sizes.
- Integrated a **motivational quote generator** and a **daily word challenge game** to promote user interaction and positive engagement, boosting average session time.
- Integrated a **community-driven forum section** for users to share personal stories and tips, encouraging interaction and supporting a positive online environment with the help of Firebase.
- Deployed the frontend on **Vercel** and backend APIs on **Render**, ensuring smooth performance.
- **Live Link**: **MotiveMentor**
